

**120 years of Olympics** has showcased beautiful cultural diversity around the globe and a closed gender parity as the tournament evolves. From inception till date we have seen more women - **27.49%** participate in the tournament, a deviation from the wholly male dominant competition at inception.

How many gold medals did your team win? How many Silver medals did your team win? How many Bronze medals did your team win?

Country participation by Season Games hosted in the top 3 cities

## Insights

\* Women had 0% appearance in the first tournament in 1896 to 27.49% in 2016.

\* Great Britain won atleast one gold medal in all games in the summer season.

\* Participants aged 23 won more medals in the tournament than any other age, while participants within the age bucket (0 - 25yrs) also won more Gold medal than every other age bucket.

\* It also evident that as women participation rate increased, the number of Gold medals they won also increased.

\* The total medals won by United States alone accounted for 14.2% of all medals won by all countries together.

\* Greece ranked number one with 48 medals at inception but dropped to 30th in the ranking with only 255 Medals representing 0.64% of the total medals won at the tournament.

\* 106,529 participants and 72 countries never won a medal in the tournament.

\* London hosted the highest number of events in the tournament.

\* Michael Phelps won the highest number of medals in the tournament with 23 gold, 2 silver and 3 bronze medals.
